1. ☒ The applicant is hereby notified that the International Search Report has been established and is transmitted herewith.

Filing of amendments and statement under Article 19:

The applicant is entitled, if he so wishes, to amend the claims of the International Application (see Rule 46):

When? The time limit for filing such amendments is normally 2 months from the date of transmittal of the International Search Report; however, for more details, see the notes on the accompanying sheet.

Where? Directly to the International Bureau of WIPO
34, chemin des Colombettes
1211 Geneva 20, Switzerland
Facsimile No.: (41-22) 740.14.35

For more detailed instructions, see the notes on the accompanying sheet.

2. ☐ The applicant is hereby notified that no International Search Report will be established and that the declaration under Article 17(2)(a) to that effect is transmitted herewith.

3. ☐ **With regard to the protest** against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:

☐ the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.

☐ no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.

4. **Further action(s):** The applicant is reminded of the following:

Shortly after **18 months** from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication.

Within **19 months** from the priority date, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later).

Within **20 months** from the priority date, the applicant must perform the prescribed acts for entry into the national phase before all designated Offices which have not been elected in the demand or in a later election within 19 months from the priority date or could not be elected because they are not bound by Chapter II.

NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been/is filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

1. [Where originally there were 48 claims and after amendment of some claims there are 51]:
"Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
2. [Where originally there were 15 claims and after amendment of all claims there are 11]:
"Claims 1 to 15 replaced by amended claims 1 to 11."
3. [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
"Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or
"Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
4. [Where various kinds of amendments are made]:
"Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international application is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

Applicant KONINKLIJKE KPN N.V. et al.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 2 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☒ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

3

☐ None of the figures.

If the Supplemental Box is not used, this sheet should not be included in the request.

1. If, in any of the Boxes, the space is insufficient to furnish all the information: in such case, write "Continuation of Box No. ..." [indicate the number of the Box] and furnish the information in the same manner as required according to the captions of the Box in which the space was insufficient, in particular:
- (i) If more than two persons are involved as applicants and/or inventors and no "continuation sheet" is available: in such case, write "Continuation of Box No. III" and indicate for each additional person the same type of information as required in Box No. III. The country of the address indicated in this Box is the applicant's State (that is, country) of residence if no State of residence is indicated below;
 - (ii) If, in Box No. II or in any of the sub-boxes of Box No. III, the indication "the States indicated in the Supplemental Box" is checked: in such case, write "Continuation of Box No. II" or "Continuation of Box No. III" or "Continuation of Boxes No. II and No. III" (as the case may be), indicate the name of the applicant(s) involved and, next to (each) such name, the State(s) (and/or, where applicable, ARIPO, Eurasian, European or OAPI patent) for the purposes of which the named person is applicant;
 - (iii) If, in Box No. II or in any of the sub-boxes of Box No. III, the inventor or the inventor/applicant is not inventor for the purposes of all designated States or for the purposes of the United States of America: in such case, write "Continuation of Box No. II" or "Continuation of Box No. III" or "Continuation of Boxes No. II and No. III" (as the case may be), indicate the name of the inventor(s) and, next to (each) such name, the State(s) (and/or, where applicable, ARIPO, Eurasian, European or OAPI patent) for the purposes of which the named person is inventor;
 - (iv) If, in addition to the agent(s) indicated in Box No. IV, there are further agents: in such case, write "Continuation of Box No. IV" and indicate for each further agent the same type of information as required in Box No. IV;
 - (v) If, in Box No. V, the name of any State (or OAPI) is accompanied by the indication "patent of addition," or "certificate of addition," or if, in Box No. V, the name of the United States of America is accompanied by an indication "continuation" or "continuation-in-part": in such case, write "Continuation of Box No. V" and the name of each State involved (or OAPI), and after the name of each such State (or OAPI), the number of the parent title or parent application and the date of grant of the parent title or filing of the parent application;
 - (vi) If, in Box No. VI, there are more than three earlier applications whose priority is claimed: in such case, write "Continuation of Box No. VI" and indicate for each additional earlier application the same type of information as required in Box No. VI;
 - (vii) If, in Box No. VI, the earlier application is an ARIPO application: in such case, write "Continuation of Box No. VI", specify the number of the item corresponding to that earlier application and indicate at least one country party to the Paris Convention for the Protection of Industrial Property for which that earlier application was filed.
2. If, with regard to the precautionary designation statement contained in Box No. V, the applicant wishes to exclude any State(s) from the scope of that statement: in such case, write "Designation(s) excluded from precautionary designation statement" and indicate the name or two-letter code of each State so excluded.
3. If the applicant claims, in respect of any designated Office, the benefits of provisions of the national law concerning non-prejudicial disclosures or exceptions to lack of novelty: in such case, write "Statement concerning non-prejudicial disclosures or exceptions to lack of novelty" and furnish that statement below.

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

V. Statement under Article 35(2) PCT:

Reference is made to the following documents:

D1: EP-A-0 529 269 (IBM) 3 March 1993 (1993-03-03)

D2: US-A-5 297 144 (GILBERT SHELDON L ET AL) 22 March 1994
(1994-03-22) cited in the application

1. It is not clear what technical contribution over the prior art represented by D1 or D2 (see the passages cited in the International Search Report, as well as the drawings) has been made by the present independent Claims 1 and 10. In this respect, D2 already discloses, in addition to the features in the preamble of Claims 1 and 10, the feature relating to the transmitter deactivation in response to the absence of a selection message for that first station during a selection time slot (column 10, line 61 - column 11, line 14). These features are also disclosed in D1 (column 7, line 52 - column 8, line 18). Both documents are concerned with the problem of an efficient battery power management and provide a solution based on the same essential features as the application (deactivation of circuit parts not to be used in idle periods).

The actual technical problem that could be identified in the arrangement known from D2 is the fact that a reservation time slot must be present in the time window for each first station.

However, this problem is already solved in D1 with the transmission in a single selection time slot ("indexing message in the header sections") of the selection messages (in the form of a list, RLIST or TLIST), according to the corresponding features of Claims 1 and 10.

Thus, the essential features of Claims 1 and 10 are already anticipated by the disclosure of D1. The subject-matter of Claims 1 and 10 hence lacks an inventive step (Article 33(3) PCT).

Even if the non-explicit disclosure of a synchronisation time slot in D1 (regarded as implicit in the function of the headers) could be argued, the subject-matter of Claims 1 and 10 would still lack an inventive step in respect of an obvious combination the teachings of D1 and D2, since a skilled person, facing the problem of optimising the time window duration present in D2 due to the need to have one selection time slot per first station, would readily recognise a solution in the transmission of the selection messages (e.g.; as a list) during a single selection time slot according to D1, and would find no difficulty when implementing that solution in the arrangement known from D2 as a normal exercise of professional competence, thus arriving at the subject-matter of Claims 1 and 10 without employing an inventive skill.

In such a case, the subject-matter of Claims 1 and 10 would lack an inventive step (Article 33(3) PCT) in respect of D1 and D2 in combination.

2. Arguments based on features "not explicitly expressed" in the claims cannot be accepted in support of a possible inventive step of the claimed subject-matter, especially if they are based on vague assumptions about the fact that, in that respect, "at least" some of the features in the claims "was meant to be", while others "preferably also". Only what is explicitly mentioned in the claims has a limiting character on the scope of protection conferred and defines the subject-matter in terms of technical features.

That the choice of the terms in the claims may have derived from a deficient translation of a single word, should have not represented an obstacle to the possibility of amending the wording of the claims based on suitable, clearer expressions taken e.g. from the description.

Moreover, some of the arguments submitted (e.g., that communication is enabled "without a first and a second station having been in contact with each other") are in contradiction with the actual subject-matter of the claims (e.g., the feature relating to the transmission of a synchronisation message from the second station to the first station, prior to the transmissions involving data), so that their technical relevance within the context of the present application is questionable.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/IB99/00702

Therefore, examination is only possible on the basis of the subject-matter of the claims, represented by the combination of their technical features giving them the meaning they have according to the way they are formulated. Since no amendments have been effected on the claims, the objections in the above paragraph 1 have to be maintained.

3. Moreover, the features in the dependent Claims 2 to 8 do not add anything of inventive significance to the subject-matter of Claim 1, since they represent further implementation details which would fall within the normal competence of a skilled person, or would become apparent to that person following from the teachings of the cited documents.
4. It appears, however, that the additional features in present dependent Claim 9 could, if they had been added to the present independent claims, have represented a difference bearing a technical significance (the technical effect of adjusting "the duration of each time window to the number of first stations to be selected, i.e. the amount of data to be transmitted", such that the power management can be further optimised) which is not regarded as derivable from the teachings of the cited documents.

If corresponding independent claims, including the above-mentioned special technical features, had been filed in the course of this Preliminary Examination, then an inventive step could have been acknowledged and the present application could have been found to meet the requirements of Article 33(1)-(4) PCT.

VII. Certain defects:

1. The opening part of the description should have been modified to bring it into agreement with the amended independent claims that should have been filed (Rule 5.1(a)(iii) PCT). Particular attention should have been paid to avoiding any reference to "the invention" or to "embodiments" thereof in parts of the description not falling within the scope of the claims to be filed.

2. In addition to D2, the cited document D1 should have been acknowledged and briefly discussed in the opening part of the description (Rule 5.1(a)(ii) PCT), so as to put the invention into the proper perspective.

Following from the disclosure of D1, the statement of problem in the introductory part of the description should have been revised in such a way that the problems existing in the arrangement known from D1 had become apparent to the reader, as well as to have clearly indicated where the technical contribution associated with the application lies (PCT Guidelines, II-4.4 and II-4.6).

3. The Applicant's requests to amend the application cannot be adopted by the Examiner, in view of the fact that the PCT requires that "amendments to the claims, the description and the drawings must be made by filing replacement sheets" (Rule 66.8(a) PCT and PCT Guidelines VI-7.2) and that "the applicant must submit [any] such sheet in typed form" (PCT Guidelines VI-7.4).
-

VIII. Certain observations:

1. The present independent Claims 1 and 10 do not meet the requirement following from Article 6 PCT taken in combination with Rule 6(3)(b) PCT that any independent claim must contain all the technical features essential to the invention.
 - 1.1 In this respect, it is clear from the description (e.g., page 7, lines 22-23) that the characterising feature relating to the transmission of the selection messages should refer to both their transmission in a single selection time slot (as currently claimed in Claim 1) and to the fact that they are transmitted consecutively (as claimed in Claim 10). Thus, both features should have been present in any independent claim representing the invention.
 - 1.2 Moreover, the preamble of Claim 10 lacks the references to the respective time slots (synchronisation, selection, response) associated with each phase of the transmission, in correspondence with the steps in the preamble of Claim 1.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/IB99/00702

- 1.3 The above-mentioned features should be thus considered as essential to the definition and performance of the invention (PCT Guidelines III-4.1, III-4.3 and III-4.4), and as such, they should have been included in any independent claim.
2. In view of the above objection, it is considered that the system independent claim that should have been filed, should have hence included the same feature combination as the amended Claim 1 that should have been filed (for the sake of consistency), but drafted in terms of system features (i.e., by associating the functional features in the method claim to the corresponding system parts).
3. The general statement in the last paragraph of the description (page 10, lines 15-18), suggesting that the extent of protection may be expanded in some vague and not precisely defined way, is not clear, and when used to interpret the claims, the statement renders them also unclear, contrary to Article 6 PCT (cf. also PCT Guidelines III-4.3a). This statement should have therefore been deleted (or at least the passage in lines 15-16 from "the invention ..." to "...shown, and that" should have been deleted and the clause "as defined by the appended claims" should have been added at the end of line 18).

The demand must be filed directly with the competent International Preliminary Examining Authority if two or more Authorities are competent, with the one chosen by the applicant. The name or two-letter code of that Authority may be indicated by the applicant on the line below:
